

A results-driven **Flutter Developer** with **2.7 years of experience** building scalable, high-performance **mobile applications for Android and iOS**. Skilled in **Clean Architecture & MVVM**, Firebase services, REST API integration, local databases, and payment systems (Razorpay / UPI), with hands-on expertise in **IoT and hardware integration** (Raspberry Pi, Bluetooth, device communication). Proven ability to deliver enterprise-level solutions across **fintech, industrial automation, and productivity** domains. I practice **AI-driven development** with ChatGPT, GitHub Copilot, Google Gemini, Claude AI, Cursor AI & Windsurf to accelerate delivery and code quality.

WORK EXPERIENCE

Flutter Developer

May 2026 - June 2026

LogicGo Infotech · Surat, Gujarat

Contributed to multiple live client applications in a product-focused Flutter team, owning UI development, API integration, and QA across several modules.

- Worked on production apps including **Omeeba** (social platform), **Online Lottery** (live draw), **Health Compass** (health scheduling) & **Center Grade** (card grading).
- Built and integrated UI screens, REST APIs, and Firebase modules; performed Figma-based validation, QA testing, and bug fixing across user and admin flows.

Flutter Developer

July 2025 - December 2025

Hexotix Pvt Ltd · Industrial & Smart Device Applications

Massive Tech Lab (REVEAL Diamond Detector, JTR). Independently built a Flutter app for an industrial diamond-detection device with Raspberry Pi hardware.

- Developed the complete Flutter application with real-time device connectivity and data-visualization UI communicating with **Raspberry Pi** based hardware.
- Built interfaces to identify Natural, Lab-Grown (HPHT/CVD) diamonds and simulants (CZ, Moissanite), with scan initiation, live analysis, result reports & device status.
- Integrated the Flutter frontend with **Python** backend services and optimized UI for mobile, tablet, and Full-HD monitor displays.

Junior Flutter Developer

January 2024 - June 2025

Tecocraft Infusion Pvt Ltd · Surat, Gujarat

Delivered consumer and business mobile apps and maintained a large portfolio of remote-control applications at scale.

- Migrated and maintained **75+ Flutter** Smart TV & AC remote-control apps by upgrading Flutter SDK, Android SDK, JDK, dependencies & AdMob integrations.
- Built a multi-role **Milk Delivery & Payment** app (Customer, Delivery Boy, Admin) using MVVM, Firebase auth, real-time DB, and UPI / Razorpay payments.

Trainee Flutter Developer (Internship)

July 2023 - December 2023

iFlutter · Surat, Gujarat

- Learned Flutter fundamentals and built foundation apps (News, Gallery & Hobby) using MVVM, REST APIs, and local storage.

EDUCATION

Ph.D. in Computer Science (AI & ML)

Karnavati University, Gandhinagar · Under Process

2025 - Present

Master of Computer Applications (MCA)

Jain University, Bangalore

2025 · Outstanding 9.95

Bachelor of Computer Applications (BCA)

S.V. Patel, VNSGU, Surat

2023 · First Class 7.56

CORE SKILLS

Flutter & Dart

Clean Architecture & MVVM

Firebase (Auth, Firestore, FCM, Storage)

REST APIs (Dio / HTTP)

State Management (Provider, BLoC, GetX)

Payments (Razorpay, UPI)

IoT & Hardware (Raspberry Pi, Bluetooth)

Local Storage (SQLite, Shared Prefs)

Performance Optimization

AI TOOLKIT

CODING: GitHub Copilot · Cursor AI · Windsurf

IDE: Android Studio · VS Code

RESEARCH: ChatGPT · Google Gemini · Claude AI

PRODUCTIVITY: Claude AI · ChatGPT

FEATURED PROJECTS

PROJECT 01

REVEAL Diamond Detector

Industrial Diamond-Detection Device App (Hexotix)

Android · Tablet · Monitor

Lead App Developer

Independently designed and developed the complete Flutter app for the REVEAL industrial diamond detector. Implemented real-time device connectivity and data-visualization UI communicating with Raspberry Pi based hardware, with workflows for scan initiation, live analysis, result reports, and device status monitoring. Built interfaces to identify Natural, Lab-Grown (HPHT/CVD) diamonds and simulants (CZ, Moissanite), integrated with a Python backend.

Flutter

Raspberry Pi

REST API

IoT

PROJECT 02

Milk Delivery & Payment

Multi-Role Business & Consumer App (Tecocraft)

Android · iOS

Flutter Developer

Built a multi-role Flutter application using MVVM for Customer, Delivery Boy, and Admin panels. Implemented Firebase authentication, role-based login, and real-time database integration. Designed screens for order scheduling, billing, invoices, and payment history, and integrated UPI / Razorpay online payment workflows with a clean, user-friendly UI.

Firebase

MVVM

UPI / Razorpay

PROJECT 03

Smart TV & AC Remotes

75+ Remote Control Applications (Tecocraft)

Android

Migration & Maintenance

Migrated and maintained 75+ Flutter remote-control applications at scale. Upgraded Flutter SDK, Android SDK, JDK, and third-party dependencies, refactored deprecated APIs, and updated AdMob integrations to keep the entire portfolio stable, compliant, and release-ready across Play Store updates.

Flutter

Android

AdMob

PROJECT 04

Omeeba

Social Media & Community Platform (LogicGo)

Android · iOS

UI & API Integration

Contributed to an Instagram-style social platform, building UI for posts, polls, and shared content, and integrating REST APIs for real-time data flow. Worked on interaction modules and performed QA testing and bug fixing across feature flows to ensure smooth, responsive performance.

UI

REST API

QA

PROJECT 05

Online Lottery

Lottery & Live Draw Application (LogicGo)

Android · iOS

UI Development

Worked on an online lottery app covering authentication, bet states, bet lists, notifications, bank selection, and a live-draw section. Integrated supporting modules, validated screens against Figma designs, and tested both user and agent apps with bug fixing for a reliable end-to-end experience.

UI

Bank Module

QA

PROJECT 06

Health Compass

Health & Medicine Scheduling App (LogicGo)

Android · iOS · Web

Developer & QA

Contributed to a cross-platform health companion for medicine scheduling and tracking. Worked on UI and API-bound modules, performed full app and web QA across onboarding, dashboard, and admin flows, and supported client demos with continuous bug fixing and validation.

MORE DELIVERED WORK

MORE APPLICATIONS

- › **News App** : MVVM news app with REST API category filtering, bookmarking & search
- › **Gallery App** : Photo viewer with grid view, image preview & local storage support
- › **Hobby App** : Local-storage hobby tracker built on a clean MVVM structure
- › **Center Grade** : Card-grading app (LogicGo), UI & QA contribution

DOMAIN STRENGTHS

- › **Industrial & IoT** : Raspberry Pi device apps, socket programming & real-time data sync
- › **Fintech & Payments** : Razorpay / UPI workflows, billing, invoices & payment history
- › **Productivity & Consumer** : Social, health, news & media apps across Android and iOS
- › **Scale & Maintenance** : Large-scale migration of 75+ apps with SDK upgrades

TECHNICAL EXPERTISE & WHAT I BRING

Architecture & Clean Code

Design maintainable apps with MVVM, Clean Architecture & SOLID principles, using reusable components, custom widgets, and responsive, adaptive UI.

State Management

Hands-on with Provider, BLoC & GetX, plus dependency injection and reactive programming for predictable, testable, scalable state.

API & Firebase Integration

Integrate REST APIs with Dio / HTTP (JSON parsing, auth, token management, error handling) plus Firebase Auth, Firestore, Realtime DB, FCM & Storage.

Payments & Device / IoT

Razorpay & UPI payment gateways, Bluetooth & hardware communication, Raspberry Pi integration, QR / barcode scanning & deep linking.

AI-Driven Development

Build faster with ChatGPT, GitHub Copilot, Google Gemini, Claude AI, Cursor AI & Windsurf for code generation, debugging, and review.

Performance & Release

App performance monitoring, debugging & troubleshooting, offline data & caching, Agile delivery, code review & release management.
